***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by McGreevy et al. (US 4781175). In figures 4 and 10 McGreevy et al. disclose a connecting device for an electrosurgical instrument that comprises at least one gas supply line (228) and one power supply line (222) comprising a housing (44) out of which passes a gas supply line with a power line disposed within the gas supply line; a branching device located in the housing by way of which the power supply line is diverted out of the gas supply line in order to form respectively a gas connection end piece and a power-connection end piece; a plug to which the gas-connection end piece and the power-connection end piece are coupled and which is fastened to the housing in order to make connection with a socket in an appliance or with connecting leads; and a filter is disposed within the housing in the gas-connection end piece.
